***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach a punch for a rotary compression press that has a rotor, the rotor having at least one die bore and guiding bore for axial guidance of the punch, the punch having a shank and key locking mechanism. The punch further having an insert and trunnion-shaped projection, the die insert biased by a spring and the insert being adapted to automatically rotate in the end-side bore in a first rotational direction and to be axially moved against the bias of the spring against an upper stop by means of a cooperation of threaded spindle and spindle nut, when the insert is pressed into the die bore against the material therein and to rotate back in the reverse rotational direction and to be axially moved against a lower stop axially spaced from the upper stop when the insert is moved out of the die bore. The closest prior art, Streit and Wieder, fails to teach the automatic rotation of the die insert by the elements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
